Software Requirements Specifications

Introduction

Purpose
The purpose of this document is to describe the requirement specification for the web site "Fan Fantasy."
The intended audience for this document is the prospective developers of this site.

Scope
The web site to be created is a site designed to inform others of the Final Fantasy games series. It will include a home page, a page with info, a page with the games, a page with the battle systems, a page with the characters, and a page with recurring themes.

Definitions, acronyms, and abbreviations
HTML - Hypertext markup language
CSS - Cascading Style Sheets
W3 Validation - refers to both HTML and CSS validation tool provided by the W3c.org.
The HTML validator is located at: http://validator.w3.org/
The CSS validator is located at: http://jigsaw.w3.org/css-validator/

Overview
The rest of this document contains an overall description of the Fan Fantasy web site.

Overall Description

The web site is to contain a home page that introduces the purpose of the site, a page that contains the information needed to further explore the site, a page with the description of the series, a page with the list of games, a page with the main characters, a page with the battle systems, and a page with the recurring themes in the series.

Specific Requirements

1. Location - all files will be located in the folder as specified on the assignment page. Failure to have you site located in the correct place by the due dates will result in a zero on the assignment. Be sure to pay attention of lowercase letters.

2. HTML Validation - All pages will pass W3C HTML validation for HTML5.

3. CSS Validation - All pages will pass W3C3.0 CSS validation.

4. Meta Information - All pages will contain a proper title tag, meta tags (author, character set and description).

5. Header - All pages will contain a header with the logo about your site. File name should be header.php.

6. Navigation – All pages will contain navigation to all other pages on the site using an ordered list. File name should be nav.php.

7. Content - Use the article, aside or section HTML elements. All files will use .php extension (main.php, photos.php, pics.php).

8. Browser compatibility - This site will be checked on Firefox, Safari, Chrome and Internet Explorer.

9. Screen Resolutions - Your site should be able to handle a little flexibility in different size screens and still look reasonably well.

10. Footer - All pages will contain a footer with the content determined by you. File name will be footer.php.

11. Your site will be broken up into separate functional files, ie header, nav, footer. You will use .php extension and include these files in each page.

12. Make the main.php page – a page that describes the purpose of the web site.

13. Make the description.php page – a page that describes the Final Fantasy series.

14. Make the games.php page – a page that has a list of games. Each item on the list will link to a specific page that describes that game.

15. Make the characters.php page – a page with a list of main characters from each game.

16. Make the battle.php page – a game describing the different battle systems that appear in the series.

17. Make the themes.php page – a game that lists and describes the different things that appear in the series.

18. CSS – all pages will have a linked style sheet.
